Personal Statement

- Recent graduate of Robert Gordon University, First-Class Honours BSc (Hons) Computing and Creative Design.
- Contemporary and practical skillset encompassing various multimedia including graphic design, animation, filmmaking, 3D modelling and developing games and websites, including personal portfolio page.
- Well-versed using Adobe Creative Suite and Figma, strong understanding of design principles and UI/UX - Honours project was interactive hybrid-animated user interface, combining custom 3D and 2D assets in Unity engine using distinct visual style, requiring solid composition fundamentals to convey visual hierarchy and mock-ups to ensure consistent aspect ratio between animated and interactive elements.
- Confident working with groups under time constraints, e.g. in camera crew filming local WW2 short film via Crow House and helping organise and run large-scale RGU Computing Society events such as the RGU Hack, a student-led 24-hour marathon programming event with industry sponsors. Additionally created promotional material for these events and the Belmont Community Zine.

Education

BSc (Hons) Computing and Creative Design, First-Class Honours – Robert Gordon University, Sep 2021 – Jul 2025

Secondary Education - Mearns Academy**,** Sep 2015 – May 2021

Experience & Volunteering

Christmas Casual, Royal Mail *November 2025 – December 2025*

- Seasonal position at the Altens sorting office, working night shift.

Zine Committee, Belmont Community Cinema *October 2025 – Present*

- Responsible for graphic design and layout of upcoming magazine.

Crow House Film Accelerator *March 2025 – September 2025*

- Involved in the development and production of a short film locally in Aberdeen, as part of the camera crew and as an extra.

RGU Computing Society *October 2023 – April 2025*

- Representing creative disciplines (*Computing and Creative Design, Digital Media*). Created promotional graphics and helped run society events, e.g. a beginner-friendly Blender workshop demonstrating the 3D modelling software and 24-hour RGU Hack, featuring programming challenges and networking with industry sponsors. Required strong communication and organisational skills.

Class Representative *October 2023 – May 2025*

- Elected class representative for my course and both Digital Media routes. Duties involved engaging classmates, collecting and relaying feedback to staff in liaison meetings to guide future improvements to modules – we need to be dependable and trustworthy.

Skills & Software

Graphic Design

2D & 3D Animation

3D Modelling

Web Design & Development

Game Development

Filmmaking & VFX

UI/UX

Editing

- Higher Spanish - B
- Higher History - C
- Higher Computing - C

Projects

Honours Project

- An interactive hybrid/2.5D animated user interface running in the Unity engine, blending custom 3D and 2D components in a consistent comic-book inspired style. Guided by functional and non-functional requirements, the project progressed through concept development, implementation and iteration based on user-testing feedback to create a fully functional interface with animated transitions between screens. Partially evaluated on successful implementation of accessibility considerations, e.g. for those with visual impairments. Applied HCI and user-centred concepts to design for the user and guide best practices for GDPR-complaint collection of participant data.

Portfolio Website

- Developed personal portfolio during university, maintaining and updating it since. Designed to be concise, primarily visual and responsive across devices. Made use of browser insights and analytics to guide further improvements and adjustments regarding accessibility and performance.

VR Game

- Tasked with creating an immersive VR experience with a renewable energy theme, with the user carrying out various maintenance tasks on an oil rig to repel a Kaiju-esque monster. Used immersive design elements e.g. environmental effects such as heavy rain and audio/visual cues to craft atmosphere and utilised HCI design concepts such as affordances to communicate tasks and the uses of interactable objects to the player.
