Personal Statement

- Recent graduate of Robert Gordon University, First-Class Honours BSc (Hons) Computing and Creative Design.
- Contemporary and practical multimedia skillset, strong understanding of Blender, Adobe Creative Suite and design principles. Experience designing and developing games and websites, e.g. personal portfolio page.
- Honours project was interactive hybrid-animated interface, combining custom 3D character created and animated in Blender with 2D vector assets in Unity engine using distinct visual style, requiring solid composition for consistency and visual hierarchy across components.
- Confident working with groups under time constraints, e.g. in camera crew filming local WW2 short film via Crow House and helping organise, run and creating promotional graphics for large-scale RGU Computing Society events such as the 24-hour RGU Hack, an annual marathon programming event with industry sponsors.

Education

BSc (Hons) Computing and Creative Design, First-Class Honours – Robert Gordon University, Sep 2021 – Jul 2025

Secondary Education - Mearns Academy**,** Sep 2015 – May 2021

Experience & Volunteering

Christmas Casual, Royal Mail *November 2025 – December 2025*

- Working night shift at Altens sorting office, categorizing parcels by postcode and unloading deliveries from warehouse in build-up to Christmas. Required to work closely in teams and follow managers' instructions, changing stations when required.

Zine Committee, Belmont Community Cinema *October 2025 – Present*

- Responsible for graphic design and layout of printed mini zine.

Crow House Film Accelerator *March 2025 – September 2025*

- Member of camera crew for Aberdeen short film. Collaborated closely in groups, assisted with camera operation (e.g. changing lenses, pulling focus, transported expensive, heavy equipment. Also took on additional role as extra, covering when a costume didn't fit.

RGU Computing Society *October 2023 – April 2025*

- Representing creative disciplines (*Computing and Creative Design, Digital Media*). Created promotional graphics and helped run society events, e.g. a beginner-friendly Blender workshop demonstrating the 3D modelling software and 24-hour RGU Hack. Required strong communication and organisational skills.

Class Representative *October 2023 – May 2025*

- Elected to engage classmates and liaise with staff.

- National 5 French
- National 5 Art and Design

Projects

Honours Project

- An interactive hybrid/2.5D animated user interface running in the Unity engine, blending custom 3D and 2D components in a consistent comic-book inspired style. Guided by functional and non-functional requirements, the project progressed through concept development, implementation and iteration based on user-testing feedback to create a fully functional interface with animated transitions between screens. Partially evaluated on successful implementation of accessibility considerations, e.g. for those with visual impairments. Applied HCI and user-centred concepts to design for the user and guide best practices for GDPR-complaint collection of participant data.

Portfolio Website

- Developed personal portfolio during university, maintaining and updating it since. Designed to be concise, primarily visual and responsive across devices. Made use of browser insights and analytics to guide further improvements and adjustments regarding accessibility and performance.

VR Game

- Tasked with creating an immersive VR experience with a renewable energy theme, with the user carrying out various maintenance tasks on an oil rig to repel a Kaiju-esque monster. Used immersive design elements e.g. environmental effects such as heavy rain and audio/visual cues to craft atmosphere and utilised HCI design concepts such as affordances to communicate tasks and the uses of interactable objects to the player.
